

FIELDFLEX

MOBILE SPACE MANAGER

PRODUCT HIGHLIGHTS

- use integrated floor plans to locate rooms, assets, and occupants, and update data on-the-fly
- review and create service tickets as problems are noted during a survey
- markup (redline) floor plans as changes in layouts and structure are noted during a survey
- utilize wireless barcode scanners to conduct rapid asset inventories and updates
- access other documents, such as floor plans, images and reference manuals from the mobile survey application

FieldFLEX™ provides you with powerful mobile workplace software to track & manage your assets, maintenance and facility operations throughout your organization.

FieldFLEX™ is used by facilities planners, surveyors, asset and logistics technicians to record and audit space, occupancy, allocation and asset information using mobile devices. Inventory counts, occupancy surveys and space surveys, critical to your business mission, are conducted using FieldFLEX mobile survey forms and interactive floor maps to locate and update information. To further streamline activities and ensure field technicians are collecting data in the most efficient way, wireless barcode readers can be used with FieldFLEX to quickly scan and gather data.

FieldFLEX gives you the confidence your asset, space and occupancy data is accurate and up-to-date.
